Prepare & Maintain

Prepare

Prior to your sunless session...

- Shower, shave and exfoliate prior to your sunless session, removing all sunless barriers, such as dry skin. *Remember after showering, do not apply unapproved beauty products.
- Dress in loose-fitting clothing for your appointment.
- Immediately prior to your session apply provided barrier cream to nails, cuticles, elbows, hands and feet.
- During your sunless session, it is recommended you wear provided protective eye wear, nose filters, disposable hair cap, and undergarments. Also, seal lips with lip balm.

Maintain

Following your sunless session...

- Refrain from showering or perspiring for a minimum of 6 hours.
- Sunless color will begin to develop after 6 hours and continue to darken for up to 24 hours.
- Moisturize your skin daily to hydrate and maintain even, natural-looking color longer.
- When showering avoid harsh soaps, which will dry out your skin quickly.
- Avoid chlorinated pools, spas, and salt water which will cause your skin to exfoliate and fade quicker.
